

minimiser convergence (fmax 0.05 -> 0.005 eV/Å, 64 Å nanomesh) strain-increment convergence (1%, 0.5%, 0.25% with direction, 0.5% without) system size convergence (exact periodic repeats of a 32 Å mesh pattern: 1x, 2x, 3x; fixed 12 Å crack in 40/60/90 Å cells)
